FONTE REGINA STARO

One water, two sizes, two sectors...and another essential feature!

A sub-group of the A.I.S. Associazione Italiana Sommelier, the Meat Division, had also found that the high mineralisation supports the delicate grilled meat flavour and does not mask and wash it away. With today's community of barbecue lovers, Fonte Regina Staro is another delight For the ho.re.ca as well as for the GDO, Fonte Regina Staro is today an absolute added value when it comes to the right companion for a good steak.

Placement at the meat counter is particularly recommended as effective cross merchandising.

It underlines the competence of the meat sales staff, but also gives the service staff in a restaurant a product with which the company can clearly distinguish itself from its competitors.
